Other Skills & Technologies

Ajax, Amazon Web Services, Apache Tomcat, Gulp/Grunt, LAMP, Node.js, RESTful APIs, Sass/Less, Sketch, Vagrant

SUMMARY

I'm a professional Front-End Web Developer and Interface Designer. I pride myself on producing clean, readable, maintainable code, as well as attractive and usable web designs. I excel in balancing my "right-brained" creative half with my "left-brained" logical half, and I'm obsessive about learning new technologies and techniques.

EXPERIENCE

Equitable Life & Casualty

(December 2016 – February 2017)

UI Developer

I worked on several internal web applications, including modifying and updating the user interface and implementing new features and fixes related to back-end API updates.

AAPC

(October 2016 – November 2016)

UX Designer & Front-End Web Developer

I lead the design and development of ReadyMed.com and worked on the Angular 2 web application backend.

Maverik Inc.

(February 2016 – September 2016)

Senior App Developer

I created and maintained several Maverik company web sites and applications. Including a complete rebuild of an internal Maverik Real Estate Management app, updates to the Maverik Rewards Manager app, and changes to Triton (the internal store management site).

TCS Technologies

(June 2015 – November 2015)

Front-End Web Developer & Mobile Project Manager

I was brought on to lead the development of a responsive design solution for a suite of e-commerce Websites. I created several prototypes and test layouts, and implemented several changes to transition to a Responsive Web Design.

ZAGG Inc.

(September 2012 – October 2015)

Front-End Web Developer

I worked on numerous projects including multiple product launches, moving the site to a Responsive Web Design, and a recent migration to the Magento e-commerce platform.

Overstock.com

(September 2010 – February 2012)

Front-End Web Developer

I worked on a multitude of holiday, sale, and promotional web pages. I designed web banners and promo images. I also worked on the maintenance and layout of the site's continuously evolving content.
