SUMMARY

I'm a professional Front-End Web Developer and Interface Designer. I pride myself on producing clean, readable, maintainable code, as well as attractive and usable web designs. I excel in balancing my "right-brained" creative half with my "left-brained" logical half, and I'm obsessive about learning new technologies and techniques.

EXPERIENCE

TCS Technologies   (June 2015 – Present)
Front-End Web Developer & Mobile Project Manager

I was brought on to TCS to lead the development of a responsive design solution for a suite of eCommerce Websites. I've created several prototypes and test layouts, and implemented several changes to begin a transition to a Responsive Web Design.

Technologies and Tools: HTML5, CSS3, Responsive Design, jQuery (UI & Mobile), JavaScript, PHP, MVC Frameworks, Adobe Creative Suite, Git, Vagrant

ZAGG Inc.   (September 2012 – Present)
Front-End Web Developer

I've worked on numerous projects including multiple product launches, moving the site to a Responsive Web Design, and a recent migration to the Magento e-Commerce platform.

Technologies and Tools: HTML5, CSS3, Responsive Design, JavaScript, jQuery, PHP, MVC, Magento, Bootstrap 3, Git, MySQL, Adobe Photoshop

TechMediaNetwork   (Summer 2012)
Web Developer - Contractor

Primary responsibilities included PHP debugging, code cleanup & AB testing.

Technologies and Tools: HTML/CSS, PHP5, JavaScript, MySQL

Overstock.com   (September 2010 – February 2012)
Front-End Web Developer

I worked on a multitude of holiday, sale, and promotional web pages. I designed web banners and promo images. I also worked on the maintenance and layout of the site's continuously evolving content.

Technologies and Tools: HTML/CSS, jQuery, JavaScript, Adobe Photoshop & Dreamweaver, Aptana Studio

Xennsoft   (Summer 2010)
Web Developer - Contractor

Worked on converting existing static HTML client solution to ASP.NET.

Technologies and Tools: ASP.NET, Master Pages, HTML, CSS, JavaScript, Visual Studio, Adobe Dreamweaver
