SUMMARY

I'm a professional Front-End Web Developer and Interface Designer. I pride myself on producing clean, readable, maintainable code, as well as attractive and usable web designs. I excel in balancing my "right-brained" creative half with my "left-brained" logical half, and I'm obsessive about learning new technologies and techniques.

EXPERIENCE

Maverik Inc.   (February 2016 – September 2016)
Senior App Developer

I created and maintained several Maverik company web sites and applications. Including a complete rebuild of an internal Maverik Real Estate Management app, updates to the Maverik Rewards Manager app, and changes to Triton (the internal store management site).

Technologies and Tools: HTML/CSS, PHP, JavaScript, SQL, Bootstrap, AngularJS, Tomcat, Node.js

Basic Research   (December 2015 – February 2016)
Senior Web Developer

I worked at Basic Research managing several Magento e-Commerce web stores running on Amazon Web Services.

Technologies and Tools: Magento, Amazon Web Services, PHP, HTML, CSS, Vagrant

TCS Technologies   (June 2015 – November 2015)
Front-End Web Developer & Mobile Project Manager

I was brought on to TCS to lead the development of a responsive design solution for a suite of eCommerce Websites. I created several prototypes and test layouts, and implemented several changes to begin a transition to a Responsive Web Design.

Technologies and Tools: HTML5, CSS3, Responsive Design, jQuery (UI & Mobile), JavaScript, PHP, MVC Frameworks, Adobe Creative Suite, Git, Vagrant

ZAGG Inc.   (September 2012 – October 2015)
Front-End Web Developer

I worked on numerous projects including multiple product launches, moving the site to a Responsive Web Design, and a recent migration to the Magento e-Commerce platform.

Technologies and Tools: HTML5, CSS3, Responsive Design, JavaScript, jQuery, PHP, MVC, Magento, Bootstrap 3, Git, MySQL, Adobe Photoshop

Overstock.com   (September 2010 – February 2012)
Front-End Web Developer

I worked on a multitude of holiday, sale, and promotional web pages. I designed web banners and promo images. I also worked on the maintenance and layout of the site's continuously evolving content.

Technologies and Tools: HTML/CSS, jQuery, JavaScript, Adobe Photoshop & Dreamweaver, Aptana Studio
